Fast-learner with international experience seeking opportunity in Data Analysis Barcelona.

Experience

3scale - Barcelona

December 2014 - June 2016

Sales & Events: Generated leads, followed up on prospective clients through email, cold-calling and live events including product and Proof-of-Concept demos.

Content Creation: Created sales materials and industry-targeted market reports. Published subset of results in the form of a blog post series (see Publications). Prepared promotional email campaigns targeted at the banking industry with [Marketo](#).

Data Enrichment: Correlated scrapped information on clients with internal company database to better understand clients' needs. Tools utilized included: [Kimonolabs](#), [Import.io](#) and Chrome's [Web-scraper](#).

Data Analysis: Debugged and formatted financial data by creating Python algorithms. Ran data through SQL, executing joins, windowing and pivot functions. Created views and setup time and category filters with [PeriscopeData.com](#), a visualization tool.

Nanocloud - Paris

August 2013 - November 2013

Strategy: Composed Nanocloud business plan which helped to value the company at €7 million.

WHV - New Zealand

August 2011 - April 2012

Various jobs: Waiting tables in Wellington, farming with [WWOOF](#) organization across New Zealand.

LGBC - Versailles, France

June 2010 - July 2010

Research: Improved an experimental process incrementally on fruit flies.

Education

NEOMA Business School, Reims, France

2012 - 2015

Master's Degree: Business Administration and Management, Corporate Strategy with honours

UVSQ, Versailles, France

2008 - 2011

Bachelor of Science (BSc): Genetic, Cellular and Molecular Biology

Projects

Machine Learning Helper (ongoing): Coding an application to help select an algorithm. Currently plots a clean dataset into different charts. On the road map: documenting, cleaning and preparing dataset, executing machine learning algorithms. Hosting my projects through a reverse proxy (NGINX).

Personal Blog: Added a feature to [Pelican](#) to fit images into [Bootstrap CSS](#) carousel. Customized layout.

Random name-generator: Used statistics to return names relevant to an age range and displayed on site using HTML and CSS.

Publications
